

# **VF SERIES AHU REMOVAL INSTRUCTIONS**

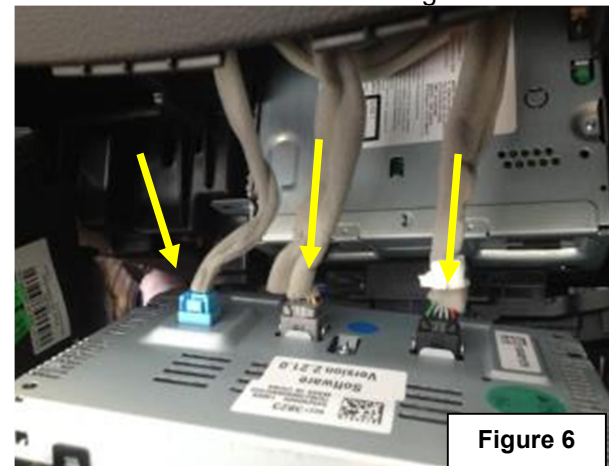

1. Remove left and right dash console covers. Refer Figure 1 & 2

2. Using a 7mm socket remove the 2 screws on both the left and right side(4 screws in total) between the front fascia and climate control panel. Refer figure 3 and 4.

3. Grasp front fascia in the following position and pull out. Refer figure 5. Disconnect the 3 connections at the back of the fascia (refer figure 6) and place in a suitable area to ensure it won't get scratched.

4. Grasp climate control module and using both hands pull towards the rear of the vehicle and remove the 1 connection. Refer figure 7 and 8. Also place in a suitable position to ensure it won't get scratched.

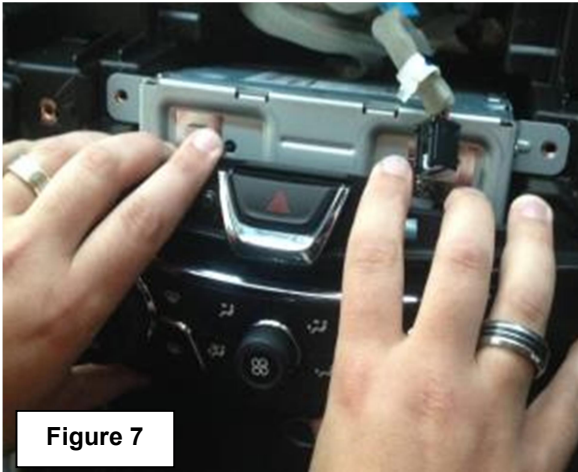

Figure 7

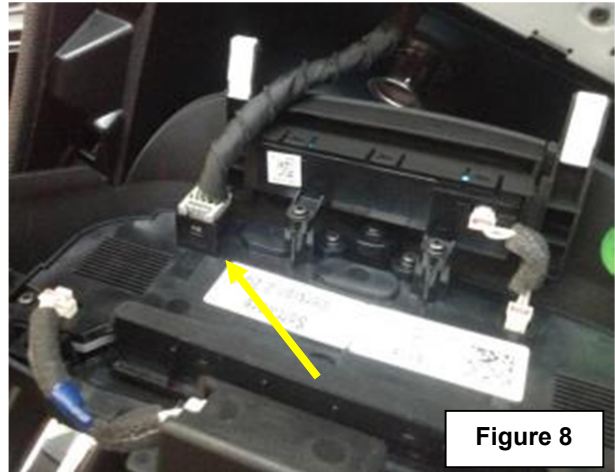

Figure 8

5. Remove both Left and Right Console wings, these can be lifted slightly at the bottom and pulled towards the rear of the vehicle. Do not pull them up or they will break. Refer figure 9.

**NOTE: ALTHOUGH NOT NECESSARY TO REMOVE THE WINGS IT WILL ENSURE THEY ARE NOT SCRATCHED WHEN REINSERTING AUDIO MODULE.**
